

EXHAUST FAN

SXIM-XF-01

Built for efficient and continuous ventilation, this exhaust fan is equipped with a DC motor and double ball bearing system that ensures smoother rotation, lower noise, and extended lifespan. The 100% copper wire motor improves electrical conductivity and performance stability, delivering reliable airflow for residential and commercial environments.

FEATURES

- High-efficiency DC motor
- Double ball bearing system for longer durability
- 100% copper wire coil for better conductivity
- Low noise operation
- Energy saving performance
- Stable and continuous airflow
- Easy installation and maintenance

APPLICATION

- Bathrooms
- Kitchens
- Warehouses
- Commercial spaces

CE IP20

PHYSICAL DATA

Finish	White
Protection Level - IP	IP 20
Installation Size	200 X 200 mm
Type of Installation	Wall / Ceiling Mounted
Body Material	PP
Coil Material	100% Copper
Motor Type	DC Motor
Bearing Type	Double Ball Bearing

ELECTRICAL DATA

Input Power	12W
Energy Saving	YES
Operating Voltage	80-245V~
Frequency	50-60 Hz
Air Flow	220 CFM

DIMENSIONS
